

TENTRANS WORKSHOP

9 October CTICC 09h00-11h00

AN OFFICIAL SIDE EVENT AT WINDABA 2019

This research project examines how South Africa's REIPPP programme is designed and how it interacts with national industrial development and local economic development.

As the largest and first of its kind in sub-Saharan Africa, REIPPPP offers valuable academic and policy-relevant insights for other countries across the continent and globally that are in the process of designing and adopting similar RE tendering schemes.

In particular, important insights can be obtained from studying whether and how REIPPPP has fostered broader developmental objectives.

The research is organised into three work packages, which will each present their emerging research findings. The discussion will provide for opportunity to interrogate the research and make suggestions for how to guide it going forward.

The Denmark-based UNEP DTU Partnership is collaborating with Danish Technical University (DTU) Wind, the Danish Institute for International Studies, University of Cape Town and Stellenbosch University.

Industry partners are the Danish Wind Industry Association (DWIA) and the South African Wind Energy Association (SAWEA).

Speakers

Dr Ivan Nygaard, Chief Scientific Advisor
Department of Management Engineering, Technical University of Denmark
Introduction of the Tentrans research agenda

Wikus Kruger, Research Fellow
Graduate School of Business (GSB), University of Cape Town
Renewable energy auction design and implementation: why the details matter

Dr Holle Linnea Wlokas, Research Associate
Centre for Complex Systems in Transition (CST), Stellenbosch University
Building resilient stakeholder relations in REIPPPP communities: Knowledge gaps, challenges, and lessons learnt in support of a strong social license to operate

Glen Robins, Research Associate
Policy Research in International Services and Manufacturing (PRISM), University of Cape Town
Questions concerning opportunities and constraints for a successful wind energy local content programme

Prof Mark Swilling, Co-director
Centre for Complex Systems in Transition (CST), Stellenbosch University
Reflections and outlook: Towards an integrated developmental renewable energy strategy for SA

Workshop discussion

The workshop will provide participants with presentations from three main speakers, which will share the emerging research findings in 15min presentations. The presentations will be followed by an open discussion.

The workshop will be chaired by **Ntombifuthi Ntuli (SAWEA CEO)**.

- 9h00 to 9h10 [Official welcome](#)
Tobias Elling Rehfeld - Ambassador to South Africa, Royal Danish Embassy.
- 9h10 to 9h20 Welcome and introduction of the Tentrans project and researchers
Dr Ivan Nygaard, Chief Scientific Advisor, Danish Technical University
- 9h20to 9h40 Renewable energy auction design and implementation: why the details matter
Wikus Kruger, GSB, University of Cape Town
- 9h40to 9h50 Building resilient stakeholder relations in REIPPPP communities: Knowledge gaps, challenges, and lessons learnt in support of a strong social license to operate
Holle Wlokas, CST, Stellenbosch University
- 9h50 to 10h10 Questions concerning opportunities and constraints for a successful wind energy local content programme
Glen Robins, Research Associate, PRISM, University of Cape Town
- 10h10to 10h30 Reflections and outlook: Towards an integrated developmental renewable energy strategy for SA
Mark Swilling, CST, Stellenbosch University
- 10h30 to 11h00 [Questions and Answers](#)
