

Windaba Breakaway 12 to focus on Wind in distributed and embedded renewable energy

With global shifts towards an energy transition, the Windaba conference will host a platform for a discussion on 'The Role of Wind Power in distributed and embedded renewable energy'. Africa is poised to harness the economic dividends of a secure and environmentally sustainable renewable power sector.

Windaba Conference 2019, will explore contemporary topics that will ensure stakeholders are provided with the most up-to-date information on the sector's opportunities and challenges. Knowledge sharing is a key component of this year's conference. The conference through, its strategic partnership with the Africa-EU Energy partnership (AEEP), has gathered a formidable line-up of industry subject matter experts. The AEEP, offers a long-term strategic framework for strategic dialogue between Africa and the EU on sustainable energy and has provided key input and supporting instruments for over a decade.

Breakaway 12: Knowledge stream supported by the Africa-EU Energy Partnership

Join moderator as Kevin Minkoff, Technical SAWEA Working Group Chairperson & the facilitator for Breakaway 12: The role of wind power in distributed and embedded renewable energy

Date: Wednesday, 9 October 2019
